

Remarks/Arguments

The Examiner has maintained the objection set forth in paragraph (g) of Paper No. 2 and has maintained the rejection of claim 1 under 35 USC 112, second paragraph, set forth in Paper No. 2, paragraph 4. Accordingly, applicant has amended the portion of claim 1 which includes the words and phrases to which the Examiner objects. Applicant submits that amended claim 1 clearly describes the relationship between the elements recited therein and is in full compliance with 35 USC 112, second paragraph. Support for the amended language of claim 1 is found in the paragraph bridging pages 6-7 of the Office Action and in Figs. 3A-3E.

The Examiner has maintained the rejection of claim 3 under 35 USC 112, second paragraph, as set forth in Paper No. 2, paragraph 6. In response to this rejection, applicant has amended claim 3 to more particularly define the invention. In this regard it is to be noted that the word "other" preceding "adhesive promoter" has been deleted and the two occurrences of the term "and/or" have also been deleted from claim 3.

The Examiner has maintained the rejection of claim 9 under 35 USC 112, second paragraph, as set forth in Paper No. 2, paragraph 9. In rejecting the claim the Examiner urges that the terminology "potentially acidic" is indefinite because it is not clear what properties would render a catalyst "potentially acidic". In response to this rejection applicant has changed the term "potentially acidic" to "acidifiable". Applicant submits that the original term "potentially acidic" clearly means that the catalyst has the potential of becoming converted to an acid catalyst. This concept is clearly and unambiguously indicated by the term "acidifiable" which is the adverb form of the verb "acidify" which means "to convert into an acid". In this regard applicant has enclosed a copy of the dictionary meaning of "acidified" from

CHEN et al.
Appl. No. 10/092,427
Reply to OA of: January 7, 2004

Webster's Ninth New Collegiate Dictionary. In view of the above, it is clear that the phrase "said catalyst is acidic or is acidifiable" is clear and unambiguous and is in full compliance with 35 USC 112, second paragraph.

Lastly, the Examiner has maintained the rejection of claim 9 under 35 USC 112, second paragraph, as set forth in Paper No. 2, paragraph 10. In rejecting the claims, the Examiner urges that the term "the bake" is unclear because neither claim 1 nor claim 3, upon which claim 9 depends, recites a baking step. Applicant has therefore deleted the portion of the claim in which the objectionable term appears.

In view of the above arguments and applicant's further amendment to the claims, applicant respectfully requests reconsideration and allowance of all of the claims which are currently pending in the application.

Respectfully submitted,
